Please note this template should be used as a guide only.

Product Specifics:

Total area (includes bleed): 426 mm (w) × 600 mm (h)

Trimmed Size: 420 mm (w) × 596 mm (h)

Visual area: 408 mm (w) × 584 mm (h)

Blue solid line indicates safe visible area.

the 1990s, the number of people who have been employed in the public sector has increased in all countries. The increase in public sector employment has been particularly rapid in the United Kingdom, where the public sector has grown from 10.5% of the total workforce in 1980 to 17.5% in 1997. This increase has been driven by a number of factors, including the expansion of the welfare state, the growth of the public sector, and the increasing demand for public services.

The expansion of the welfare state has been a major factor in the growth of public sector employment. In the United Kingdom, the welfare state has expanded significantly since the 1950s, with the number of people receiving social security benefits increasing from 1.5 million in 1950 to 10 million in 1997. This expansion has been driven by a number of factors, including the increasing life expectancy of the population, the increasing demand for social services, and the increasing demand for public services.

The growth of the public sector has also been a major factor in the increase in public sector employment. In the United Kingdom, the public sector has grown from 10.5% of the total workforce in 1980 to 17.5% in 1997. This growth has been driven by a number of factors, including the increasing demand for public services, the increasing demand for public infrastructure, and the increasing demand for public services.

The increasing demand for public services has also been a major factor in the increase in public sector employment. In the United Kingdom, the demand for public services has increased significantly since the 1980s, with the number of people receiving public services increasing from 1.5 million in 1980 to 10 million in 1997. This increase has been driven by a number of factors, including the increasing demand for social services, the increasing demand for public infrastructure, and the increasing demand for public services.

The increasing demand for public infrastructure has also been a major factor in the increase in public sector employment. In the United Kingdom, the demand for public infrastructure has increased significantly since the 1980s, with the number of people working in public infrastructure increasing from 1.5 million in 1980 to 10 million in 1997. This increase has been driven by a number of factors, including the increasing demand for public infrastructure, the increasing demand for public services, and the increasing demand for public infrastructure.

The increasing demand for public services and public infrastructure has also been a major factor in the increase in public sector employment. In the United Kingdom, the demand for public services and public infrastructure has increased significantly since the 1980s, with the number of people working in public services and public infrastructure increasing from 1.5 million in 1980 to 10 million in 1997. This increase has been driven by a number of factors, including the increasing demand for public services and public infrastructure, the increasing demand for public services, and the increasing demand for public infrastructure.
